HOPE. HEALING. INNOVATION.

When you first hear the news that you have cancer, you enter unsettling times. Yet even as you wait for more test results and talk with doctors about treatment plans, your pathway to hope has begun.

Since 1988, the expert clinical teams of the E.C. Green Cancer Center have guided patients along this journey, providing excellent cancer care for the people of Christian County and the surrounding region.

Now, the E.C. Green Cancer Center is undergoing a comprehensive transformation. Jennie Stuart Health is investing \$16.8 million into cutting-edge renovations that will bring together technology, expertise, and superior care in a welcoming patient-centered environment.

Michael Murray, MD, FACR, Medical Director, Radiation Oncology

*“We welcome the major enhancements to the E.C. Green Cancer Center, as the expanded footprint will bring all patient care into one space. Patient convenience and efficient care have been foremost in our planning.”*

*Inside the new*

# E.C. GREEN CANCER CENTER

**“I had second thoughts about undergoing radiation therapy, but after consulting with Dr. Murray, I decided to try. Dr. Murray and his staff were wonderful. They always explained every step and helped set my family and me at ease. They are competent, friendly and work so well together. I’ve never felt so comfortable in a medical setting. I highly recommend Dr. Murray and his team.”**

*– a grateful patient, Radiation Oncology*

## EFFICIENCY, PRIVACY AND COMFORT

The new Center will include an inviting and comfortable waiting area with a soothing water feature and hospitality station.

Medical Oncology / Hematology will include 25 infusion areas, designed for greater privacy and comfort during treatment. Features include recliners with adjustable heating and massage, seating for the patient’s companion, privacy curtains and an interactive screen for entertainment.

The new Center’s on-site laboratory and pharmacy will help deliver care more efficiently with less waiting times for patients. The Halcyon and TrueBeam linear accelerators provide state-of-the-art, precise and efficient radiation therapies, reducing patient treatment times.

“Excellent cancer care requires medical expertise and state-of-the-art, cutting-edge technology, and the E.C. Green Cancer Center offers both. We also know that the patient experience and care environment matter a great deal when treating the whole person. The goal of this campaign is to provide a modern and comforting environment that will meet, and exceed the expectations of our patients and their families, within our own community.”

Dr. Ratilal Gajera, MD  
Hematologist / Oncologist, Retired,  
Campaign Co-Chair

Kelley Workman,  
President, Planters Bank,  
Campaign Co-Chair

“Jennie Stuart Medical Center’s administration works hard to recruit and retain superior physicians and surgeons - and then listens to their recommendations. The expansion of the Emergency Department and E.C. Green Cancer Center are game changers. The project adds cutting-edge technology and represents the next step in our community hospital’s vision for keeping us all healthy and safe.”

## IMPACT OF YOUR GIFT

The Jennie Stuart Health Foundation has launched a campaign to support this transformation to create a healing environment that will reflect the Center’s high level of care. Your gift will support these important investments to enhance the patient experience through their treatment journey. Join us in making a difference for patients as they make their journey here, close to home.

# READY FOR THE FUTURE

*The newly renovated and expanded E.C. Green Cancer Center will have the space to bring future opportunities in cancer care to Christian County and our region. Your gift will make the Center a place of hope, healing and innovation for years to come.*

*It would be our pleasure to talk with you about additional giving options, please contact:*
